TIMNA COSTA AVERSA

Data Engineer

Berlin, Germany · timnaaversa@gmail.com · Italian citizenship · LinkedIn · GitHub

SUMMARY

Highly motivated, communicative and detail-oriented data engineer experienced in ETL processes, data modeling, data warehousing and cloud-based data solutions across AWS, Azure and GCP, including Databricks. Passionate about problem-solving, complex data and collaborating with cross-functional teams to bring the best product to clients. A committed professional who values continuous learning and enjoys sharing knowledge with others.

CORE SKILLS

ETL & tools	Python, SQL, Airflow, dbt, Bash, Pandas, Git, Linux
Cloud	AWS (S3, IAM, SNS, Lambda, EC2); knowledge of Azure and GCP
Platforms	Databricks, Snowflake, Redshift, PostgreSQL, MySQL
Governance	Data catalog, data lineage
Data work	Data pipelines, data design, data modeling, data storage, documentation
Methodology	Kanban, Scrum, Agile
Soft skills	Communication, teamwork, problem-solving, analytical skills

PROFESSIONAL EXPERIENCE

A11 · Berlin — Aug 2025 – present

Data Engineer — Sep 2025 – present

Junior Data Engineer — Aug 2025 – Sep 2025

Project A Ventures · Berlin — Feb 2024 – Aug 2025

Junior Data Engineer

Spark Networks · Berlin — Jan 2022 – Dec 2023

Global dating company with around 40 million users, behind apps such as Zoosk, eDarling, SilverSingles and EliteSingles.

Data Engineer — May 2023 – Dec 2023

Junior Data Engineer — Jan 2022 – May 2023

- Moved our legacy infrastructure to a modern architecture and consolidated our data warehouses in Snowflake, improving access to data and giving clients better reporting options.
- Ran ETL processes that move and transform data between systems, and maintained data governance policies and procedures for security, privacy and compliance.
- Documented our legacy systems, which made them easier to understand and maintain and made the infrastructure update possible.
- Helped design and implement data models as part of bringing dbt into our pipelines, making them more reliable, modular and reusable.
- Worked with cross-functional teams to troubleshoot data-related issues.
- Built an automated code process that makes it easy to scale and to add new data ingestion requirements.
- Over one year, was mentored by three senior team members on PEP 8 coding standards, data warehousing best practices and keeping up with emerging technologies.

EDUCATION

University of London, BSc Computer Science, March 2026

Programme with an emphasis on data science: applying and understanding essential concepts, principles and practices.

Salt Lake Community College, USA, Associate of Science in General Studies, August 2021
